SICMAT

SICMAT PARTICIPATES TO METALLOBRABOTKA

Pianezza, Italy, 2010 April 2nd After fifty years from the first participation and after twenty years of absence, *Sicmat S.p.A.* is participating to Metalloobrabotka, Russian machine tools exhibition taking place in Moscow from May 24th to 28th.

Sicmat first participation dates back to 1962: at the time it was called “exhibition of Italian Factory production”; Sicmat exhibited the universal shaving machine SSU 310, state of art for gear finishing.

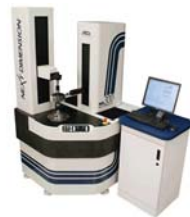

Today Sicmat introduces itself with a wide range of *hard and soft gear finishing machines*:

- The “Raso Series” CNC Shavers (*Raso 200, Raso 400, Raso 600*), able to shave from the small automotive gearbox pinion to the 600 mm diameter gear for construction equipment.
- The synchronized spindles shaver *Raso 250 TP*, last generation of soft gear finishing machine, born for high volumes applications.
- The honing machine *Grono 250*, with the innovative external toothing grinder, that brings shaving strengths to hard finishing field.
- The gear measuring machine *ND 300*, made by our American partner *PECo*.
- The linear chamfering/deburring stand alone unit *LCD 200*.

Raso 250 TP

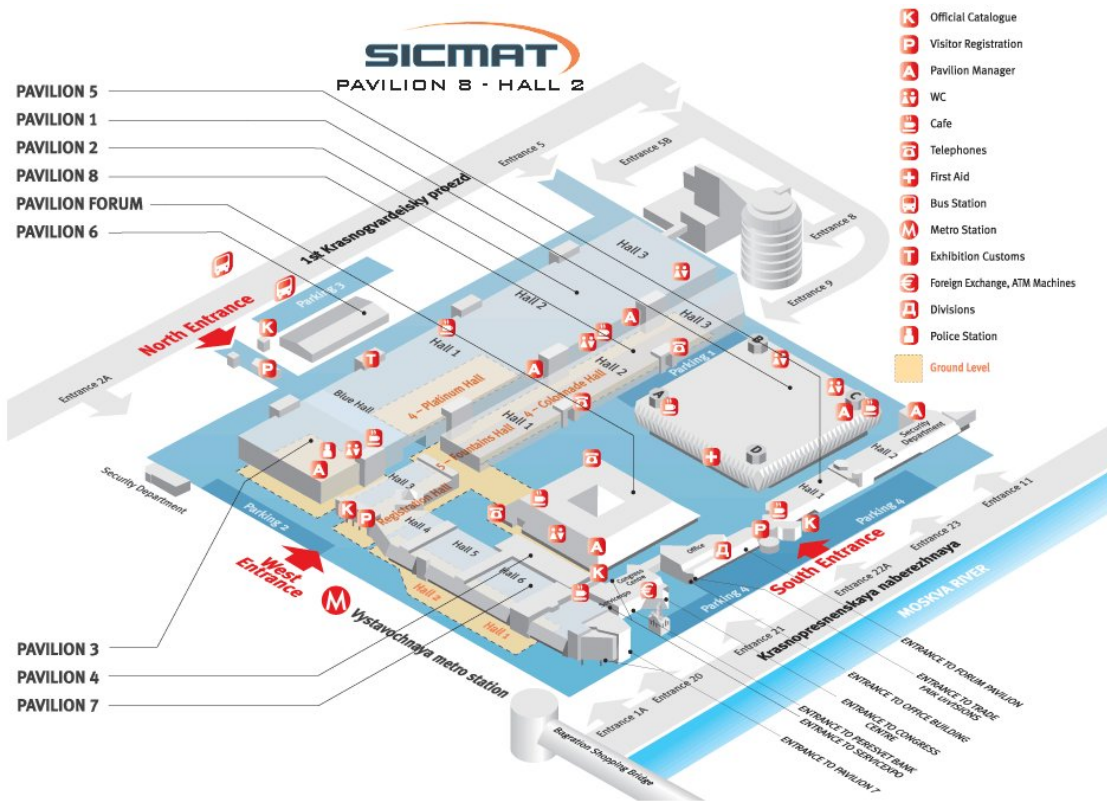

PECo ND 300

Raso 400

You'll find us at Pavilion 8, Hall 2.
